Europrofile Deadlocks

52220 Lock Type

Deadlocks are available in both bar and hookbolt versions. The locks provide security deadlocking for a variety of aluminium doors including swinging and sliding applications.

The hookbolt is constructed from stainless steel and is a 5 ply laminated construction, with the centre core case hardened, complete with hardened roll pin to resist hacksaw attack.

All locks are designed to accept standard profile cylinders or thumbturns.

Range of backsets available

Faceplate finish SAA

Stainless steel laminated lockbolts

Locks accept standard 17mm Europrofile cylinders and thumbturn

Accessories available

- Lock cylinders
- Faceplates

3 YEAR GUARANTEE
