## Mortice Door Magnet

### AL1982-35.5

The Alpro 1982.35.5 Vortex magnet is designed for use when a mortice type installation is required. When external pressure is applied to open the magnet and break the hold of the unit, the pivoting pin head fitted into the electro magnet holes will initiate an additional locking from the upward movement of the integrated ball bearings which hold the pivoting pin head on the armature plate securely. When the power is disengaged from the magnet, it releases its hold on the armature plate and it returns to its normal state. The unit requires a filtered and regulated DC power supply of the correct voltage to ensure the attraction of the armature plate is initiated. The unit operates on 12/24VDC and is complete with two built in SPST reed switch sensors for remote lock monitoring status and remote door monitoring status.
