Squared Pull Handle

Functional 100

The Functional 100 series pull handles are manufactured to meet your requirements. Available in up to 3000mm overall length; these 30mm square handles are offered with either straight or offset pillars, with or without an over-hang, as either bolt-thru (single side) or back to back (pair) fixing.

Each handle will come complete with a fixing kit to suit your requirements, designed for aluminium, timber or glass door applications.

Available in Satin Stainless Steel (SSS) and Polished Stainless Steel (PSS). Coated options are available on request.

- Grade 316 Steel
- Supplied with fixings
- Robust and aesthetically pleasing
- Made to order in the UK

Please Note

A centre pillar is recommended for handles 2000mm and over or heavier doors.

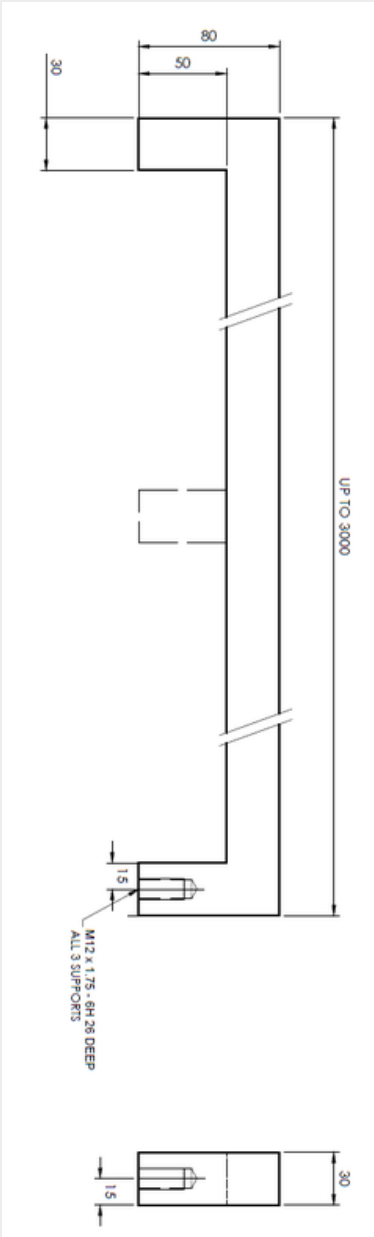

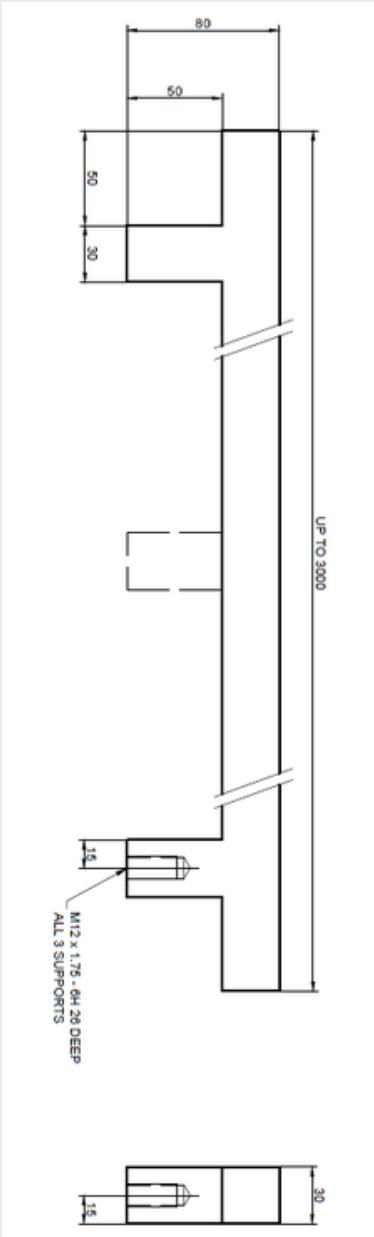

With the overhang option, the overall length is 100mm greater than the centre size as standard.

Ordering Information

Painted powder coat available upon request.
