NARROW STILE CODELOCK

The narrow stile mechanical Codelock is suitable for aluminium doors. It is an affordable alternative to electronic keypads, electrical strikes, magnetic locks and other systems used on aluminium framed doors.

The narrow stile lock is medium duty and ideal for new or retrofit applications designed to be retrofitted to Alpro or similar ANSI round cylinder mortice deadlatches. The locks have a variety of access control functions, allowing the user flexibility on how to manage entry - by key, code or code free entry.

Features

- Suitable for medium-duty internal and external aluminium door applications
- Ideal for new or retrofit installations
- Keypads available with a threaded round mortice cylinder or Euro profile cylinder
- All models operate ANSI-style round mortice cylinder deadlatches
- Entry by code or key, with Code Free Access on selected models
- Full-size lever, ball knob and stubby lever options
- Field handed for left- or right-hung doors
- Suitable for door thicknesses from 45mm to 70mm
- 8,191 non-sequential code combinations with single-code storage
- 14 stainless steel keypad buttons
- Zinc alloy construction with a stainless steel-effect PVD finish
- Neoprene seals included
- Keyed-alike options available on request

3 YEAR WARRANTY

LOCK MODELS

Front and Back Plates

Narrow stile Codelock complete with cams, threaded cylinder and lever handles.

Front and Back Plates

Narrow stile Codelock complete with cams, Euro profile cylinder and lever handles.

Code Change Method

Requires removal of the lock from the door. The code can be changed by repositioning the tumblers in the code chamber. Locks are supplied with a random code commencing with the 'C' clear button.

Although the keypad can be supplied with either a Euro profile or threaded round mortise cylinder, both versions are designed to operate the same ANSI-style round mortise cylinder deadlatch. Codelock, deadlatch and faceplates must be ordered separately.

Code Free Access

The ALP0465 and ALP0475 (including +EXT) models provide a Code Free Access mode. These models feature a black dot on the 'Y' button. When the 'Y' button is pressed along with a correct code input, the lever will retract the latch freely until disabled.
