Straight or Cranked Pull Handle

Functional 97

The Functional 97 series pull handles are manufactured using 41 mm diameter Satin Anodised Aluminium (SAA) tubing, or 38 mm diameter Stainless Steel, offered in Satin (SSS) and Polished (PSS) finishes.

They come bespoke up to 3000mm and are designed for aluminum, timber and glass door applications.

All sizes are available with either straight or offset brackets and are suitable for bolt-thru (single side fixing) or back to back (pair) fixing.

Fixing kits are provided as standard F27/F28. Other fixing kits are available on request.

Stainless Steel and Polished Stainless Steel handles are manufactured from Grade 316 Stainless Steel

Various handle fixings available to suit most door types. Link: [**Pull handle fixing information**](#)

Please Note

- A centre bracket is recommended for handles 2000mm and over or heavier doors.
- The 97-326 cranked has a 39mm throw.
- Handles can be supplied assembled or unassembled - please specify.
- Coated handles are available upon request. Additional lead times should be allowed for these items and may be subject to a surcharge.

Please specify at time of ordering if the length given is overall handle length or the cross centres of the fixing holes
